Rob,

Thanks for taking a look at this.

Subject: Treasure Island: Final Radiological Management Plan

On your request I have reviewed the *Final Radiological Management Plan* (DCN:ITSI-0808-0006-0022) dated July 2013. The document was prepared for BRAC Program Management Office West by ITSI Gilbane of Walnut Creek, California. I have previously reviewed the draft version and the Navy's responses to comments.

As I noted in my email to you dated July 10, 2013, the Navy's responses to comments were not responsive to any of the concerns that I raised. I also noted that the decision to accept or reject the radiological management plan rests with California DTSC and CalDPH.

Since only a short time has passed since the Navy received and responded to our comments, it should not be surprising that very little of the document has changed in the final version. The Final Radiological Management Plan is a large document and represents a considerable effort on the Navy's part. Therefore I expect it will remain a stable plan as the Navy addresses the remaining radioactive contamination issues at Treasure Island.
